

## ABOUT ME

I have thorough knowledge of the MERN stack (Mongo, Express, React, & Node) and experience in creating front end designs using various web frameworks such as Bootstrap and Materialize. I specialize in using JQuery, HTML, CSS, and Javascript.

**Frameworks/NPM knowledge:** Bootstrap, Materialize, Mongoose, Handlebars

**Applications:** MySQL, Heroku, Docker, Git, MongoDB, Command Line, Microsoft GP, QuickBooks, Microsoft Excel (V-lookups, Pivot Tables, Macros), Firebase

## EXPERIENCE

### FULL STACK INTERN - BRAKETHAUS

*(June 2019 – Current)*

Brakethaus is a Web Site and Application Development Company. It was started in 2018 in response to the growing need for outsourced development services and the lack of excellent and reliable development contractors. We specialize in outsourced development work for Design and Development Agencies. In addition, we provide services including Web Consulting and UX/UI design. Although our focus is Agency Contracting, we provide services to individuals and businesses alike.

## PROJECTS

**KANGAROO** - <https://kangarooleasing.herokuapp.com/>

- Complete MERN Stack web application. Kangaroo is a sub-leasing app that shows available sub leases open in Metro Atlanta. Lease holders are able to register and login to the app and create listings to add to the database and can be viewed by the public.
- **Tools/Languages used:** MongoDB, Express.js, React.js, Node.js

**THE KRUSTY KRAB** - <https://thekrustykrab.herokuapp.com/>

- The Krusty Krab is a restaurant app based off of the popular cartoon Spongebob Squarepants. Users can choose what items they would like to order and the SQL database will be updated.
- Responsibilities: Handled the Frontend of app. HTML page creation, CSS styling, Javascript/jQuery functionality
- **Tools/Languages used:** Materialize, Bootstrap, Javascript, jQuery, HTML5, CSS, AJAX, Giphy API, Node, Sequelize, Heroku, MySQL, API/HTML routing
