Projects

The Krusty Krab | <https://github.com/illimitableissi/Project-2> | Link: <https://thekrustykrab.herokuapp.com/>

- The Krusty Krab is a restaurant app based off of the popular cartoon Spongebob Squarepants. Users can choose what items they would like to order and the SQL database will be updated.
- Responsibilities: Handled the Frontend of app. HTML page creation, CSS styling, Javascript/jQuery functionality
- Tools/Languages used: Materialize, Bootstrap, Javascript, jQuery, HTML5, CSS, AJAX, Giphy API, Node, Sequelize, Heroku, MySQL, API/HTML routing

TravelLite | <https://github.com/usafowose/Project-1> | Link: <https://usafowose.github.io/Project-1/>

- TravelLite is a simple travel app. Users will enter in a place they would like to visit, as well as their origin city, and are shown the cheapest flight prices, images, and upcoming weather of their destination
- Responsibility – Handled the accuweather.js file which pulls the weather information from the Accuweather API and uses DOM manipulation to append to the HTML page.
- Tools/Languages used: Materialize, Javascript, jQuery, HTML5, CSS, AJAX, Accuweather API, Pixabay API, travelpayouts API

Bamazon | <https://github.com/illimitableissi/bamazon>

- Bamazon is an Amazon-like storefront created with MySQL. This back-end app will take in orders from customers and deplete stock from the store's inventory. Bamazon will also track product sales across the store's departments and then provide a summary of the highest-grossing departments in the store.
- Tools/Languages used: Node.js, MySQL, Inquirer NPM, jQuery, Javascript, Docker

Save the Universe! | <https://github.com/illimitableissi/unit-4-game> | Link: <https://illimitableissi.github.io/unit-4-game/>

- The object of this game is to match the displayed number on the screen by clicking on the stones. Each stone has a different numerical value and they must add up to reach the target number.
- Tools/Languages used: HTML5, CSS, jQuery, Javascript
